A
Amount of safety behaviour
(mean k)
cost of harm
10^1
black: never acts
initial belief in efficacy 𝔼0[p]
B
Residual error in efficacy belief
|𝔼[p | D] − p*| after 800 episodes
information-seeking weight τ
C
Paying a little for knowledge
dissolves the trap
300
13
0 (harm-minimising)
D
The trap has two arms:
too little and too much are both blind
mean ± SD
never act:
nothing learned
about p
always act:
no outcome
ever surprises
|𝔼[p | D] − p*|
harm rate (%)
realised mean repetitions k
