a
One repetition count gives one likelihood ridge
k = 1
k = 2
k = 4
k = 6
Baseline hazard, q
Preventive efficacy, p
b
Diversity, not repetition, restores identifiability
Fixed: k=0
Fixed: k=1
Fixed: k=3
Fixed: k=6
Jittered: 5-7
Contrast: {0,6}
Graded: 0-6
Contrast: {0,1}
rank 1 (det = 0)
log₁₀ det information (full-rank designs)
c
Any two distinct counts identify both parameters
First repetition count, k₁
Second repetition count, k₂
det information
